

VIVA Assessment for Program 5: AI-Augmented Module (10 Marks)

Each student must select **any 1 difficult program** from the *NumPy Practice Set*.

For the selected program:

✓ **Ask 5 meaningful questions to ChatGPT / Gemini**

These questions must be related to logic, slicing, iteration, errors, vectorization, or any concept you genuinely did not understand.

✓ **Rewrite all AI answers in your own words**

Copy-pasted answers will receive **0 marks**.

✓ **This assignment must be written in the Record Book, immediately after Program 5.**

Record Book Format

Understanding NumPy: AI-Augmented Module

Output: (On unruled side)

Q1: (Your question)

My Understanding (in my own words based AI response):

Q2:

My Understanding (in my own words based AI response):

Q3:

My Understanding (in my own words based AI response):

Q4:

My Understanding (in my own words based AI response):

Q5:

My Understanding (in my own words based AI response):

Important Notes

- **Each student in the lab batch must select a unique program.**
(No two students should choose the same program.)
- **Simple questions** like “What is NumPy?”, “What is an array?”, “What is Python?”, etc., are **not allowed** and will not be considered for marks.
